# GreenBox Tiny Zhaga

## GBTZ / GBTZ2

### **Datasheet**

The GreenBox Tiny Zhaga are used for single control of streetlights. **LoRaWAN communication** is standard and the brightness of the streetlights is regulated via the **D4i-certified** DALI-2-interface.

An intelligent time switch for autonomous operation as well as a light sensor are implemented.

Parameterization can be made via the LoRaWAN network or **in case of GBTZ** directly via the integrated **USB-C interface**. The design and the functions are based on the tested and field proven GreenBox Compact 3 functionality and payload implementation.

#### **Technical Data**

Interface: Zhaga, DALI-2 / D4i Type: Master / Slave 24 V DC (Zhaga) Power Supply: Backup power: 0.5 F (Supercap) < 0.5 W typical Consumption: IP 66, UV-resistant Protection Class: Material: Polycarbonat Isolation: Class II Zhaga B18-Standard Mounting: Communication: LoRaWAN Temperature: -40 °C ... +75 °C Operation 0 ... 95 %, non-condensing Rel. Humidity: Weight: ca. 75 g Dimensions: 80 x 45 mm

#### **Features**

#### Articles

GreenBox Tiny Zhaga; **incl.** USB-C interface GBTZ
GreenBox Tiny Zhaga 2; **without** USB-C interface GBTZ2
